*Introduction*

## **INTRODUCTION**

### **a. 2004 Premium Rates Summary**

The WSIB Board of Directors has set the 2004 average premium rate for Schedule 1 employers at \$2.19 for every \$100 insurable earnings – the same as the average premium rate for 2003.

The average rate for 2004 is the result of careful review of the WSIB' funding strategy, and valuable input from stakeholders representing employers in a wide range of industries. In early July, the WSIB consulted on effective and responsible funding options to maintain financial security while eliminating the unfunded liability by 2014. The consensus recommendation of the stakeholders was for a zero percent rate change in 2004.

The 2004 average rate takes into account employers' concerns about harsh financial realities facing Ontario businesses in the wake of the SARS outbreak and other economic factors.

The zero percent average premium rate change does not mean rates will stay the same for all Ontario employers. Premium rates for individual rate groups have been recalculated.

The WSIB is committed to reducing the unfunded liability. Reducing the unfunded liability is essential to the long-term financial stability of the system. Moreover, the WSIB remains committed to the principle of setting annual rates at levels appropriate to our costs for the year.

For several years, the WSIB has observed a steady decline in the number of workplace injuries and illnesses serious enough to require time off work. The WSIB and its partners in Ontario's workplace health and safety system support the efforts of employers and workers to make their workplaces safer and healthier. These efforts are mitigating the effect of rising claims costs on premium rates.

The classification scheme that defines the many rate groups used in setting premium rates has had only minor changes for 2004. Consequently, the number of rate groups in Schedule 1 remains at 157. More information about rate group changes can be found in Section 8 of this manual.

## **b. The Role of the Workplace Safety and Insurance Board (WSIB)**

The Workplace Safety and Insurance Board (WSIB) plays a key role in the province's occupational health and safety system. The WSIB administers no-fault workplace insurance for employers and their workers and is committed to the prevention of workplace injuries and illnesses. The WSIB provides disability benefits, monitors the quality of healthcare, and assists in early and safe return to work for workers who are injured on the job or contract an occupational disease.

The Workplace Safety and Insurance Board (WSIB) is a statutory corporation created by an Act of the Ontario Legislature in 1914. The WSIB is responsible for administering the *Workplace Safety and Insurance Act, 1997*.

Employers covered by the *Workplace Safety and Insurance Act, 1997*, are divided into two groups, referred to as "Schedule 1" and "Schedule 2." Schedule 1 employers are insured under a "collective liability" system, and are required to contribute to the WSIB Insurance Fund. Schedule 2 employers are "self-insured," and are individually liable for the full costs of their workers' claims. The WSIB pays insurance benefits for Schedule 2 workers and is reimbursed by their employers for the costs of the claims (including administrative costs), and for the cost of the WSIB's prevention activities.

The WSIB receives no government funding or assistance. WSIB revenue must cover all costs associated with both new and existing claims. Revenue is raised through premiums, which are collected from all Schedule 1 employers covered under the *Workplace Safety and Insurance Act, 1997*. Schedule 2 reimbursements also contribute to WSIB revenue, as do earnings from a diversified investment portfolio.

This *Premium Rates Manual* pertains only to Schedule 1 and not to Schedule 2 because it is only Schedule 1 employers who are charged WSIB insurance premiums.

## **c. Funding Strategy**

The WSIB's approach to funding is flexible and responsive, with reviews that ensure premium rates are adjusted according to the success of our funding strategies. This helps us to keep rates low, while protecting the ongoing financial viability of the system.

The system currently has an unfunded liability, which means that sufficient funds are not available to pay for the full life of all the claims currently in the system. Our funding strategy remains on-target to eliminate the unfunded liability by 2014.

At \$6,591 million as of the end of 2002, the unfunded liability is at a significantly lower level than its 1993 peak of \$11,532 million. The funding ratio (the ratio of our assets to our liabilities) stood at 63.8 per cent in 2002.

A strategy is also in place to ensure that Schedule 2 employers, who are individually responsible for employee benefit costs and related administrative expenses, cover their liabilities.

In 2002, we introduced a "gain and loss" component to premium rates for Schedule 1 employers. Gains and losses are determined at the class level and spread over a period of five years. If the actual claims cost experience of a class was better than its expected experience then a gain is generated for that class. Conversely, when the actual experience was worse than expected, then there is a loss instead of a gain. For the 2004 premium rates, the gains and losses relate to accident years 1999 through 2001.

A gain results in a reduction in premium rates while a loss results in an increase. This procedure helps tune the premium rate after the fact so that actual experience is more accurately reflected.

#### **d. Derivation of the 2004 Premium Rates**

The Schedule 1 costs of the workers' compensation system are funded through premium rates being applied to the payroll of Schedule 1 employers. However, employers are not all charged at the same rate. Rather, for the purpose of charging them on a more equitable basis, employers have been classified into the rate groups defined under the WSIB' classification scheme, with each rate group having a different premium rate which reflects the inherent risk of the particular services or industries insured within that rate group.

The classification scheme maintained by the WSIB currently divides the services and industries insured under Schedule 1 into nine broad classes, which are further subdivided into 157 rate groups based on similarity of business activity and relative risk. The number of rate groups has not changed from 2003. More information about classification scheme changes can be found in Section 8 of this manual. Additional details about the classification scheme itself can be obtained by consulting the WSIB's *Employer Classification Manual*.

For each of the classes and rate groups defined in the classification scheme, the WSIB prospectively derives a premium rate to cover costs relating to the upcoming 2004 premium year. These costs include:

- a) the expected future benefit costs and claims administrative expenses of new claims for the premium year,
- b) the WSIB's administrative expenses, accident prevention costs, and other statutory obligations for the premium year,
- c) the charge towards retiring the WSIB's unfunded liability in accordance with the WSIB's strategy to be fully funded by the year 2014, and
- d) The gains and losses generated by claims cost experience of accident years 1999 through 2001.

Premium rates are determined annually on an actuarial basis and are expressed as a dollar amount per \$100 of insurable earnings.

The nine classes play a significant role in rate setting, for it is at the class level that certain cost items are estimated, using data and assumptions particular to each class. Once the class estimates are determined, corresponding estimates are derived for the rate groups comprising each class. The 2004 premium rates are based on claims experience and insurable earnings data for the most recent five years. That is, for the period from 1998 through 2002 inclusive.

There are many assumptions important in determining premium rates for the classes, including those related to the economy. For instance, changes in the level of employment and earnings of a class are two factors that can influence the insurable earnings base of that class. The source of the economic assumptions used in rate setting is the WSIB' official economic forecast.

In this regard, the WSIB annually prepares an economic forecast for each of the nine classes based on a variety of inputs including an economic outlook from *Informetrica*. This outlook is not simply for the Ontario economy as a whole but has been specifically tailored to those sectors of the provincial economy insured under the nine classes defined for Schedule 1. The class-by-class economic assumptions from the WSIB' official forecast are shown below.

### Economic Assumptions Supporting The 2004 Premium Rates

Class	Earnings Growth 2002-2003	Earnings Growth 2003-2004	Employment Growth 2002-2003	Employment Growth 2003-2004
Class A: Forest Products	2.00%	2.00%	-1.00%	0.00%
Class B: Mining and Related Industries	3.00%	2.00%	4.20%	3.00%
Class C: Other Primary Industries	2.10%	5.80%	-1.00%	-0.90%
Class D: Manufacturing	1.10%	2.50%	-0.40%	1.00%
Class E: Transportation And Storage	1.50%	1.50%	2.10%	1.20%
Class F: Retail and Wholesale Trades	1.90%	1.60%	2.10%	1.80%
Class G: Construction	1.80%	1.30%	2.00%	2.00%
Class H: Government and Related Services	1.80%	1.40%	0.00%	-0.70%
Class I: Other Services	1.30%	1.00%	0.50%	0.50%
Schedule 1	1.44%	1.76%	0.66%	0.87%

## e. Classification Scheme and Data Sources

As mentioned previously, Schedule 1 employers are divided into nine broad classes (denoted by class codes A through I). Employers within each class are then subdivided into rate groups. The grouping of employers within a single rate group is based on similarity of business activity and/or relative risk. The number of rate groups in each class varies according to the size of the class. For example, Class B *Mining and Related Industries* contains four (4) rate groups whereas Class D *Manufacturing* contains seventy-six (76) rate groups.

Rate groups are further divided into classification units, where the firms in each classification unit share similar business activities or relative risk. These classification units are used as a means of tracking the relative experience of various employer subgroups. All employers within a single rate group, no matter which classification unit they belong to in that rate group, are charged the same premium rate (before any adjustments such as for merit rating or experience rating).

The “Classes” referred to in this manual should not be confused with the various service delivery “Sectors” within the WSIB. In order to better address the unique needs of its customers, the WSIB has divided its Operations Division into sixteen “Sectors” (seventeen, including Schedule 2 employers). The WSIB recognizes that different industries are affected differently by workplace injuries – each has its own unique situations and concerns. For example, the factors affecting the Forestry sector may be markedly different from those affecting the Services sector. WSIB staff become specialists in the particular sector in which they work – this streamlines the workflow and ensures that each employer and employee is assisted by a WSIB employee with the required expertise in that industry.

The figures shown in the Supporting Documentation sections of this manual are based on the data available in the spring of 2003. Employers may obtain more recent information by calling the Employer Client Call Centre of the WSIB, who will direct calls to the appropriate WSIB department (see Section 11 of this manual for further contact information).

*Definition of 2004  
Premium Rate Components*

## **DEFINITION OF 2004 PREMIUM RATE COMPONENTS**

### **A. New Claims Cost**

- |    |                       |   |
|----|-----------------------|---|
| 1. | Gross New Claims Cost | The estimated cost of new claims for accidents expected to occur during 2004  |
| 2. | SIEF                  |   |
|    | a. Relief             | The portion of Gross New Claims Cost charged to the Second Injury and Enhancement Fund (SIEF) due to accident costs associated with second injuries |
|    | b. Transfer Charge    | Contribution to provide for SIEF relief   |
| 3. | Net New Claims Cost   | Gross New Claims Cost less SIEF relieved costs plus transfer charge levied to fund SIEF   |

### **B. Overhead Expenses**

- |    |                         |   |
|----|-------------------------|---|
| 1. | Administrative Expenses | Operating expenses of the WSIB estimated for the year 2004  |
| 2. | Legislative Obligations | Expenses the WSIB is required to fund under the <i>Occupational Health and Safety Act</i> and the <i>Workplace Safety and Insurance Act</i> |
| 3. | Accident Prevention     | Expenses for the Safe Workplace Associations (SWA') estimated for 2004  |
| 4. | Total Overhead Expenses | Total of Administrative, Legislative Obligations, and Accident Prevention (SWA) expenses  |
|    | a. Relief               | Relief granted for overhead expenses charged  |
|    | b. Transfer Charge      | Contribution to provide for overhead relief   |
| 5. | Net Overhead Expenses   | Total Administrative, Legislative Obligations, and Accident Prevention (SWA) expenses less  |

Overhead Relief plus Transfer Charge for  
Overhead Relief

**C. Unfunded Liability**

Payment required to retire the unfunded liability  
(UL) according to the funding strategy of the  
WSIB

**D. (Gain)/Loss**

Adjustment reflecting the difference in actual vs.  
expected claims cost experience for accident  
years 1999 through 2001

**E. Premium Rate**

Total cost per \$100 of insurable earnings  
required to fund new claims, overhead, and  
unfunded liability

**WSIB 2004**  
**Premium**  
**Rates** **MANUAL**

---

**SECTION 3**

---

*Summary of Allocation Rules*

## **SUMMARY OF ALLOCATION RULES FOR 2004 PREMIUM RATES**

### **A. New Claims Cost**

Gross new claims costs are determined at the class level. However, rate groups belonging to a class pay them.

The share of the class gross new claims cost charged to a member rate group is based on the number of Lost Time Injuries (LTI), the average cost of an LTI expected for that rate group and a loading for future claims administrative expenses of new claims for the premium year.

The average cost of an LTI for a rate group is determined via a Cost Index, which indicates the relative costliness of an average LTI of the rate group as compared to that of its class.

Net new claims cost is the gross cost adjusted for expected relief and transfer charge for the Second Injury and Enhancement Fund (SIEF).

### **B. Overhead Expenses**

Overhead expenses are allocated to rate groups in proportion to their net new claims cost and insurable earnings.

A rate group is granted overhead relief if its allocated overhead charge exceeds a set percentage of its net new claims cost.

Rate groups covered by a particular Safe Workplace Association (SWA) pay a share of the expenses of that SWA.

Overhead expenses for classes are the sum of expenses for member rate groups.

### **C. Unfunded Liability**

Unfunded Liability (UL) charges is determined for Schedule 1 as a whole. However, rate groups pay it.

The share of the UL charge paid by rate groups is in proportion to their net new claims cost.

The UL charge for a class is the sum of the UL charges for member rate groups.

#### **D. (Gain)/Loss**

Gains and losses are determined at the class level and spread over a period of five years. If the actual claims cost experience of a class was better than its expected experience then a gain is generated for that class. Conversely, when the actual experience was worse than expected, there is a loss instead of a gain. For the 2004 premium rates, gains and losses are based on accident years 1999 through 2001.

A gain results in a reduction in premium rates while a loss results in an increase.

The gain or loss of a class is allocated to its rate groups in proportion to their net new claims cost.

*Rate Group Changes*

## **RATE GROUP CHANGES**

The Workplace Safety and Insurance Board (WSIB) reviews the classification scheme each year. For 2004, no rate groups are being added or removed but two minor changes are being implemented.

First, a classification unit is moving from Rate Group 933 : *Equipment Rental and Repair Services* to Rate Group 670 : *Machinery and Other Vehicle, Sales*. Second, a new classification unit is being set up in Rate Group 604 : *Food, Sales*.

These changes are summarized in the table below.

SUMMARY OF RATE GROUP CHANGES FOR 2004			
The following Classification Units (CUs) ...		Will be placed into these Rate Groups for 2004	
2003 Rate Group	Description	2004 Rate Group	Description
933	Equipment Rental and Repair Services  The following CU only: <b>9911-000</b> Industrial Machinery and Equipment Rental and Leasing	670	Machinery and Other Vehicle, Sales
N/A	A new CU is established : <b>6011-100</b> Bulk Retail/Wholesale Sales	604	Food, Sales

As these classification unit changes do not affect how many rate groups there are, the number of rate groups in the WSIB's classification scheme remains at 157.

*Non-Credible Rate Groups*

## **NON-CREDIBLE RATE GROUPS**

Ideally, each rate group defined in the Workplace Safety and Insurance Board's classification scheme should be credible, that is, large enough so that reasonably reliable estimates can be made for deriving premium rates from a rate group's own claims experience. Although this is generally the case, particular industries or services in Ontario can decline substantially as the economy undergoes changes and this can lead to a situation where a previously credible rate group becomes non-credible. In addition, some rate groups have reduced the number of injuries to a level where there is not enough information available to estimate the average cost of a claim and, as a result, the rate group becomes non-credible. As part of the ongoing activity of rate making, the Workplace Safety and Insurance Board (WSIB) monitor the credibility of rate groups.

When the WSIB is concerned that a particular rate group has become non-credible, and is likely to remain non-credible, the WSIB may decide to remove such a rate group from the classification scheme through some form of rate group merger, as of a specified date. Employers in the affected industries or services would continue to be insured, but under another rate group.

Since the original development of the WSIB's current classification scheme, which was introduced in 1993, a number of rate groups have become non-credible. Different approaches have been used to address the issue of non-credibility, depending on the circumstances of each rate group.

Data supporting the 2004 premium rates shows that six rate groups are not fully credible for the purpose of rate making. Never the less, each of them has a credibility factor of 74% or above and as these factors are reasonably high, all six of these rate groups were deemed credible for 2004 premium rates setting.

It is possible that the experience of some of the non-credible rate groups may naturally return to a fully credible level, eliminating the need for additional review. However, it is expected that for some of these rate groups, the lack of credibility would need to be addressed more formally by the WSIB, possibly through reclassifications or rate group mergers.
